SUMMARY

Full Stack Developer with 2+ years of experience building scalable, production-ready applications using Java, Spring Boot, Microservices, and REST APIs, with supporting frontend skills in React.js and TypeScript. Hands-on experience building AI-native platforms and RAG (Retrieval-Augmented Generation) pipelines connecting LLMs with vector databases for context-aware responses. Proficient in MySQL, PostgreSQL, MongoDB, and Elasticsearch for event-driven and search-heavy architectures. Experienced with agentic AI workflows, NLP-driven code generation, and multi-step agentic control. Daily user of AI coding agents (Claude Code, GitHub Copilot) to accelerate delivery.

SKILLS

Backend: Java, Spring Boot, Microservices, REST APIs, Spring Security, Node.js, FastAPI (Python), CRON Jobs

Frontend: React.js, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Material UI

Databases: MySQL, PostgreSQL, SQL Server, MongoDB, Redis, Vector Databases (pgvector)

AI & Search: RAG (Retrieval-Augmented Generation), LLM Integration (OpenAI GPT-4o, Anthropic Claude, LangChain), Elasticsearch, Agentic AI Workflows, Prompt Engineering

Cloud & Tools: Docker, Docker Compos, Kong API Gateway, AWS S3, Azure Blob Storage, Azure Functions, Git, GitHub

WORK EXPERIENCE

Full Stack Developer June 2025 – Present

Ensar Solutions • Hyderabad, IN

- Built **LaunchForge**, an AI-native SaaS platform that converts a founder's natural-language business idea into structured domain models, OpenAPI specs, and production-ready frontend/backend code.
- Developed an NLP idea-parsing pipeline using LLMs (OpenAI GPT-4o / Anthropic Claude) to extract entities, roles, relationships, and business rules from plain-English product descriptions.
- Designed an interactive domain-model graph UI with React Flow for entity editing, relationship mapping, and AI-generated modeling suggestions.
- Implemented JWT/NextAuth authentication, Flyway-style PostgreSQL migrations, and multi-tenant project state management across the platform.
- Built a multi-stage codegen pipeline (domain model → API spec → frontend/backend code → TDD verification) with Sandpack/Monaco-powered in-browser live preview.
- Containerized platform services (PostgreSQL, Redis, Kafka, Keycloak, Kong, monitoring) with Docker Compose for scalable, production-ready infrastructure.
- Participated in Agile/Scrum sprints using JIRA; mentored junior developers and conducted code reviews.

Software Engineer - Full Stack May 2025

Delite Software Technologies • Hyderabad, IN

- Built MoonLeague — a real-time trading game platform using Spring Boot REST APIs and WebSockets (backend), React.js (frontend), PostgreSQL, and event-driven CRON pipelines integrating the Finnhub API for live stock/crypto data; deployed to Azure.
- Developed PersonalFreedom.ai — a multi-tenant therapy transcription platform with a complex SQL Server multi-tenant schema, .NET REST APIs, React.js/TypeScript frontend, MongoDB for transcript storage, and Azure Blob Storage media pipelines.
- Integrated Generative AI for therapy session auto-summarisation — connected LLM APIs to the .NET backend, reducing manual documentation effort by 2x.
- Maintained security controls (authentication, authorisation, data protection), code integrity, and performance across all multi-tenant applications using Git/GitHub version control.

PROJECT EXPERIENCE

LaunchForge — AI Idea-to-Production Platform Oct 2025 – Present

Role: Full-Stack / Platform Developer. Built an AI-native SaaS platform that turns a founder's natural-language business idea into domain models, APIs, generated code, tests, and deployable apps. Developed a multi-tenant AI platform that converts plain-English product ideas into structured domain models, OpenAPI specs, and production-ready frontend/backend code, with NLP extraction, interactive entity-relationship modeling, JWT auth, code generation workflows, live preview, and containerized infrastructure for end-to-end idea-to-app delivery.

- Built NLP idea-parsing pipeline using LLMs (OpenAI GPT-4o / Claude) to extract entities, roles, relationships, and business rules.
- Designed interactive domain-model graph UI with React Flow for entity editing, relationships, and AI suggestions.
- Implemented Flyway-style PostgreSQL migrations, SSO/auth (User, sessions, refresh tokens), and project state management.
- Developed multi-stage codegen pipeline (domain model → API spec → frontend/backend code → TDD verification).
- Integrated Sandpack/Monaco for in-browser code preview and live project runs via a runner service.
- Containerized platform services with Docker Compose (Postgres, Redis, Kafka, Keycloak, Kong, monitoring).

Next.js 15 | React 19 | TypeScript | Tailwind CSS | React Flow | TanStack Query | Zustand | FastAPI | OpenAI/Claude | LangChain | PostgreSQL 16 | pgvector | Redis | Kafka | Docker | Kong | Keycloak | JWT/NextAuth | Jest | Playwright

MoonLeague Mar 2025 – Oct 2025

Real-Time Event-Driven Trading Game Platform. Event-driven market data pipeline using CRON jobs and the Finnhub REST API — ingested live stock and crypto symbols, maintained PostgreSQL snapshots, and published price events for real-time game score calculations. Unity WebGL game integrated into React frontend with WebSocket-based live score sync; deployed to Azure.

React.js | PostgreSQL | WebSockets | REST APIs | CRON Jobs | Azure | PHP | Laravel

PersonalFreedom.ai Dec 2024 – Mar 2025

AI-Powered Multi-Tenant Therapy Transcription Platform. LLM-powered therapy session auto-summarisation connected to a .NET backend; complex SQL Server multi-tenant schema; MongoDB for unstructured transcript storage; Azure Blob Storage media pipeline management. React.js and TypeScript frontend with multi-role authentication, Material UI components, and full RESTful API integration.

React.js | TypeScript | .NET | SQL Server | MongoDB | Azure Blob Storage | Material UI | REST APIs | Generative AI

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2018 - 2022

Priyadarshini College of Engineering and Technology • Nellore, IN

Intermediate 2016 - 2018

KrishnaChaitanya Junior College • Nellore, India
